

Hardware upgrade &
software modification

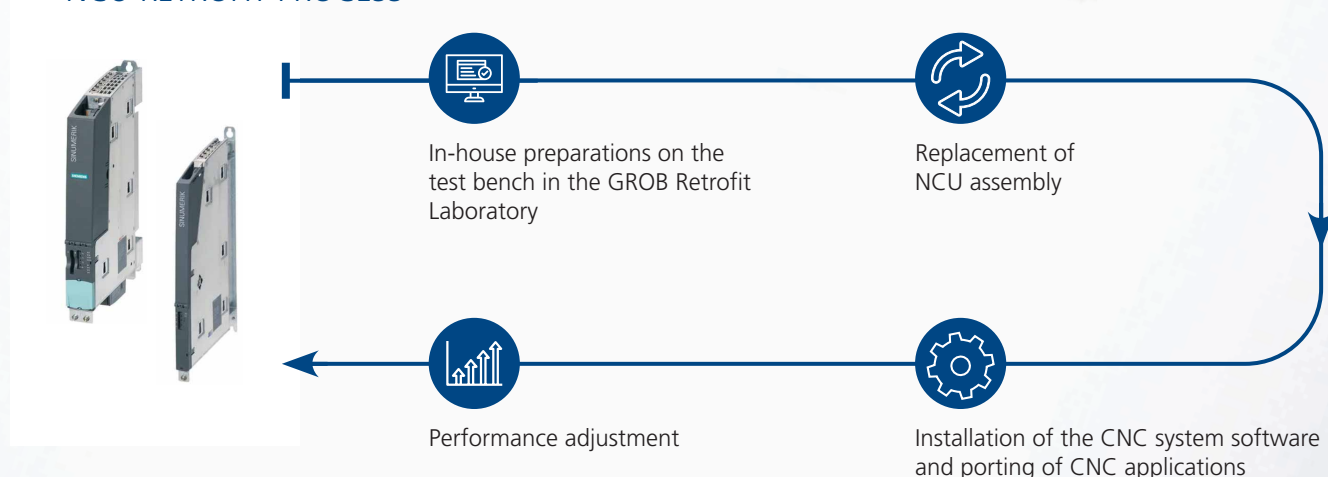

NCU RETROFIT

If there is a lack of available spare parts for your discontinued hardware with outdated software and poor performance, an NCU retrofit would solve your problem.

- + Replacement of the current NCU with a newer NCU
- + Modification of the current software to a new system
- + Machine downtime of 3 to 4 weeks: without GROB in-house measure
- + Machine downtime of around 3 to 5 days with preparation in the GROB Retrofit Laboratory

NCU RETROFIT PROCESS

HOW AN NCU RETROFIT BENEFITS YOU

- + Possible cycle time reduction
- + Considerable cost and time savings compared to a complete control system upgrade
- + Spare part availability thanks to the new hardware
- + New functions due to the new software
