

The right package for everyone

SPECIAL EQUIPMENT

Our high-quality special tools and measuring instruments allow you to inspect your GROB machine yourself and to replace components quickly and safely with your own experience. Please contact us, and we will be pleased to provide you with a set of special tools to suit your requirements. A training course held by our highly qualified employees will help you to use these special tools correctly.

- ⊕ Efficient preventive maintenance and repairs for your GROB machine
- ⊕ Repairs and inspections by your own personnel
- ⊕ Shortest possible machine downtimes

You can find more details on the special equipment in our separate special equipment brochure.

TAKE MATTERS INTO YOUR OWN HANDS!

If you can do it yourself, we will provide you with the tools you require to inspect your GROB machines and replace parts.
